*"Current Year" refers to the year in which the team visit occurs, or, if these forms are being completed in conjunction with an interim or progress report, the year in which the report is submitted to the Commission.

NOTE: Faculty data reported to NEASC for Standard 5 follow NEASC specifications and include all full-time and part-time regular payroll teaching faculty with unmodified titles at the main (Storrs) or regional campuses, including academic administrators with faculty pay titles and visiting, clinical and in-residence faculty if they are teaching. The data, compiled annually for each November 1, exclude faculty on leaves without pay, unpaid and retired faculty, non-teaching faculty with research or extension modified titles (e.g. research professor, associate extension professor), adjuncts and special payroll lecturers paid by the course, teaching graduate assistants, and non-faculty staff who contribute to the instructional delivery of courses. Faculty members at the main and regional campuses are counted with their academic discipline. The NEASC faculty data cannot be directly compared to the University's federal IPEDS or other summary reporting of faculty counts and characteristics. Contact Office of Institutional Research for further clarification of the NEASC data on faculty. Characteristics of the faculty on the Health Center payroll are separately maintained by the Health Center Department of Personnel.
